

NANDHA KUMAR

Software Engineer

☎ +91 9500505785 — Chennai, India ✉ u18ca0080nandhakumar@gmail.com [in linkedin.com/in/nandha-kumar-3322a821a](https://www.linkedin.com/in/nandha-kumar-3322a821a)

Experience

Ayphen Technologies

June 2025 – Present

Software Engineer

Chennai, Tamil Nadu

- Building scalable, microservice-driven backend systems using Spring Boot, focusing on clean architecture, modular design, and high-performance API development.
- Developing interactive and reusable UI components with React, ensuring efficient state handling, improved rendering performance, and seamless user workflows.
- Integrating GenAI-powered development agents to automate boilerplate code generation, accelerate feature development, and significantly reduce engineering effort.
- Leveraging LLM-based tools for intelligent debugging, unit test generation, code reviews, and documentation, boosting team productivity and reducing development cycle time.
- Collaborating with product, DevOps, and QA teams to ship reliable, scalable, and well-tested software solutions in an agile environment.
- Optimizing backend logic and database queries using algorithmic techniques to improve system throughput and handle high-volume data operations efficiently.

Star Health and Allied Insurance

May 2022 – Nov 2024

Full Stack Developer

Chennai, Tamil Nadu

- Engineered dynamic, component-based user interfaces using React.js, optimizing state management with hooks and context APIs to deliver a highly responsive user experience.
- Developed and optimized RESTful API endpoints using Spring Boot; utilized efficient data structures (hash maps, arrays) and caching strategies to reduce response latency and improve throughput.
- Enhanced overall product performance and user satisfaction by aligning UI/UX improvements with backend optimizations, resulting in measurable growth in customer engagement.
- Led an offshore team of three developers to deliver two mission-critical features with zero defects and on-time execution, strengthening cross-team collaboration and delivery quality.
- Boosted application performance by **20%** through concurrent API execution, optimized algorithms, and latency reduction initiatives.
- Implemented search algorithms and pagination techniques to handle large datasets efficiently, improving data retrieval speed and backend scalability.

Education

Srimad andavan arts and science college

Jun. 2018 – May 2021

Bachelor's in Computer Application (BCA)

Trichy, Tamil Nadu

Notable Projects

Ayphen Hire – AI-Powered Test Monitoring Platform | *ReactJS, Spring Boot, WebRTC, AI/ML*

August 2025

- Designed and developed a secure AI-based online assessment platform with real-time video and audio proctoring.
- Implemented multi-camera monitoring using WebRTC, including mobile camera pairing via QR code.
- Built secure browser lockdown features such as tab-switch prevention, fullscreen enforcement, and server-synced timers.
- Integrated AI-driven face, gaze, object, and voice detection to flag suspicious candidate behavior in real time.
- Developed interviewer dashboards for test management, analytics, and proctoring violation review.

Purchase Journey | *Spring Boot, ReactJS*

January 2024

- Developed a responsive and user-friendly interface using React.js, allowing users to browse, compare, and purchase various health insurance plans.
- Implemented backend services with Spring Boot to manage business logic, process user requests, and interact with the database for plan details, customer information, and policy transactions.
- Implemented Hashing techniques to handle critical customer info.

Corporate Medical Insurance Platform | *NextJS, NestJS*

December 2022

- Created an Web application using NextJS and NestJS to allow Users to purchase bulk policies for corporate employees.
- The application facilitated the management of employee data, policy selection, and bulk transactions, providing a seamless interface for corporate clients.

Star Health Website | *NEXT.JS, ANT Design, Strapi CMS, Spring Boot*

July 2022

- Designed and implemented a user-friendly and responsive website using Next.js for optimal performance and SEO.
- Integrated Strapi CMS as a backend solution, enabling content creation and management without requiring code changes.
- Developed dynamic pages using Next.js data fetching capabilities to retrieve and display content from Strapi.

Technical Skills

AI tools: Antigravity, Amazon Q, Windsurf

Programming Languages: Java, JavaScript

Developer Tools: VS Code, IntelliJ Idea, MongoDB compass, MySQL Workbench, Postman

Libraries/Frameworks: ReactJS, NextJS, SpringBoot

Developer Skills: ES6, Maven, RESTful API, JSON WebToken

DB & DevOps Skills: MySQL, Postgres, MongoDB, Linux, Git, GitHub/GitLab, Jenkins

Functional Skills: Data structure & Algorithms, SDLC, Test Driven Development, Agile/Scrum (JIRA), Problem Solving, Business Requirement Analysis, Domain-Specific Knowledge, Debugging, Self-Directed Learning, Initiative

Certification

Edyoda digital university

Aug. 2021 – Mar 2022

Java full stack certification

Bangalore, Karnataka
